

DEAR CUSTOMER,

you have acquired an article that has been decorated in a special, complex process. The temperature-dependent colours, which become visible with ice-cold drinks, are a very sensitive medium and should not be subjected to aggressive washing-up liquids or high temperatures. We recommend: Please don't use a dish-washer. Just rinse the glass several times by hand with lukewarm water and a little washing-up liquid and finish with clear running water.

More than just glassware.
